

Steps to fill a prescription online:

1. Call Longs Peak Animal Hospital and request a written prescription for online filling.
2. Fax the original script you've received to the online pharmacy you are using. This will allow the pharmacy to begin processing your order.
3. Mail the original prescription to the pharmacy. Safeguards exist on the actual prescription to indicate that it has been copied or faxed. This is the reason the pharmacy requires the original mailed in to them.
4. You may send a request with the mailed prescription asking the pharmacy to notify you by phone or email once they have received it and are ready to complete the order.
5. Once the mailed prescription is received, the order will be processed and the medication(s) will be shipped to you.
